

Unity Fully Managed Services

Total Network Peace of Mind

Technology has become critical to running and managing our organizations. Yet it is becoming more complex and time consuming to ensure it runs predictably, optimally and securely.

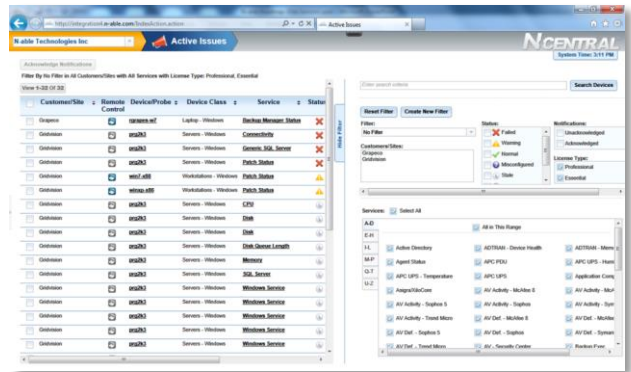

Our fully managed services can handle the day to day work for a single, predictable monthly fee.

Do these issues plague your business?

- **No Technology Plan?** Does your organization lack a strategy for how technology can best serve it into the future?
- **IT Budget Crunch?** Under pressure to reduce IT costs, increase value or maximize profitability?
- **Management Struggles?** Need to find a more efficient way to manage your company's technology?

Program Advantages:

- **Increased Productivity:** Continuous insight into your network lets us reduce the business impact of IT failure by shortening the time from network failure to issue resolution
- **Reduced Business Impact from IT Failures:** Combining preventative maintenance and remote monitoring means we minimize failures that could impact your business. Your network behaves in a stable and reliable manner
- **Reduced Network Downtime Through Proactive Maintenance:** Through regular, preventative maintenance activities designed to keep your network operating efficiently, we reduce the number of emergency incidents you encounter

Your IT Partner

We understand why your critical business services are so important to your daily operations. Your time is precious. You have more important issues to deal with than your technology. Our fully managed program is the ideal solution for an organization like yours, an organization that demands the utmost in network reliability and quality service.

We provide the benefits of an internal MIS department for a fraction of the price of staffing one yourself. We reduce the business impact of IT failures by minimizing their occurrence, and any unforeseen issues are dealt with as a top priority. All aspects of your network can be covered: security, data protection applications and hardware.

When you outsource the management of your important IT resources to us, we look upon this as a partnership. By optimizing your network's performance, it will work at the peak efficiency and reliability levels that your business demands, allowing you to focus on running your business, not your network. Security, networking, data protection and user support - we handle it all for a single, predictable price.

Backup and Restore

A comprehensive disaster recovery and business continuity program designed to protect and quickly restore your data.

eMail Anti-Spam Protection

Best-in-class email protection and spam filtering that utilizes sophisticated malware detection and antivirus technology, with real-time threat detection

Endpoint Detection Response

Help prevent ransomware by rolling back devices to their pre-infection state with sophisticated AI to detect and prevent both current and emerging threats.

Anti Virus Protection

Protect critical assets and information with advanced proactive intelligence comprised of intrusion and proactive detection and behavioural analysis.

Managed Patch

Fix vulnerabilities in your software and applications that are susceptible to cyber-attacks and reduce your security risk.

Reducing the Cost of Defense of Your Business

- ✓ Protect critical assets and information
- ✓ Reduce time recovering lost, stolen or corrupted files and data
- ✓ Prevent Ransomware disruption and fees
- ✓ Reduce wasted time deleting unwanted emails
- ✓ Reduce wasted time recovering from viruses
- ✓ Completely managed for a predictable monthly fee.

75% of small and midsize businesses rank data loss as the most significant risk to their business.
